### ABOUT

I have 6 years of experience in technology, working on the development of complete solutions, from front-end to back-end. I have expertise in Java, React.js, Node.js, MongoDB, and Python, as well as experience in infrastructure and billing systems. I am pursuing a degree in Systems Analysis and Development, I am an enthusiast of best practices such as Clean Code, and I am expanding my knowledge with Spring and new technologies.

### COURSES

- Firebird
- IA with Python
- Back-end programming with Delphi
- React with Vite
- Game Development with UNITY and C#
- Microservices Architecture from Scratch with ASP.NET, .NET 6, and C#
